

# Feiya Ou

[feiya.ou@wustl.edu](mailto:feiya.ou@wustl.edu) | <https://joyboyou.github.io/FeiyaOu>

## OBJECTIVES

---

I seek to investigate fundamental mechanisms of transcription and aspire to become a leader in connecting Genetics and Immunology.

## EDUCATION

---

### Washington University in St. Louis (WashU)

St. Louis, MO, USA

Ph.D. in Immunology

Sep 2019 – Present

Advisor: Dr. Kenneth M. Murphy

Thesis: *Molecular Circuitries in Dendritic Cell Development*

### Xiamen University

Xiamen, Fujian, China

B.S. in Biology

Sep 2015 – Jun 2019

## AWARDS & HONORS

---

- **The FASEB Journal Early Career Researcher Award** (2025): Sole recipient at the conference, awarded for presenting rigorous, impactful research findings that advance the field of science at a FASEB Science Research Conference
- **Lucille P. Markey Special Emphasis Pathway in Human Pathobiology** (2020 – 2022): a selective program designed to inspire fundamental research related to human disease, including coursework in pathobiology and clinical shadowing experiences
- **Talented Undergraduate Training Program of the Beutler Institute** (*ranked first in 20 selected students*; 2018 – 2019): a highly selective program initiated by Nobel Laureate Dr. Bruce Beutler, which included a semester of advanced coursework in Genetics and Immunology at Xiamen University, followed by a year of scientific training at UT Southwestern Medical Center
- **Pilot Program for Cultivating Top-notch Students in Basic Disciplines** (2016 – 2019)

## PUBLICATIONS (complete list available at [Google Scholar](#))

---

1. **Ou, F.**, Liu, T., Du, S., Chen, J., Koch, A. R., Kraft, M., Murphy, T. L., & Murphy, K. M. (under review). E proteins facilitate Zeb2 expression for balanced lymphoid and myeloid development. Preprint: <https://doi.org/10.21203/rs.3.rs-7455813/v1>
2. Postoak, J. L., Koch, A. R., Shan, S., Ohara, R. A., Jo, S., Chen, J., **Ou, F.**, Kraft, M., Desai, P., Diamond, M. S., Kim, S., Murphy, T. L., & Murphy, K. M. (under review). WDFY4-dependent cross-presentation proceeds via a vacuolar antigen processing route.
3. Du, S., Drieu, A., **Ou, F.**, Xu, E., Cheng, Y., Storck, S. E., Rustenhoven, J., Mamuladze, T., Bhattarai, B., Brioschi, S., Nguyen, K., Cao, J., Rodrigues, P. F., Smirnov, I., DeNardo, D., Ginhoux, F., Cella, M., Colonna, M., & Kipnis, J. (in revision). Brain-engrafted monocyte-derived macrophages from blood and skull-bone marrow exhibit distinct identities from microglia. Preprint: <https://doi.org/10.1101/2024.08.08.606900>
4. Chen, J., Liu, T.-T., **Ou, F.**, Ohara, R. A., Jo, S., Postoak, J. L., Egawa, T., Day, R. B., Murphy, T. L., Murphy, K. M., & Kim, S. (2025). C/EBP $\alpha$  activates Irf8 expression in myeloid progenitors at the +56-kb enhancer to initiate cDC1 development. *Science Immunology*, 10(107), eadt5899. <https://doi.org/10.1126/sciimmunol.adt5899>

A viable hypomorphic Arnt2 mutation causes hyperphagic obesity, diabetes and hepatic steatosis. *Disease Models & Mechanisms*, 11(12), dmm035451. <https://doi.org/10.1242/dmm.035451>

## SELECTED PRESENTATIONS

---

- 2025 *WashU Immunology Program Work-in-Progress* (opening seminar), ID2 secures cDC1 specification by antagonizing E protein activity at a pleiotropic *Zeb2* enhancer
- 2025 *Cold Spring Harbor Laboratory (CSHL) Mechanisms of Eukaryotic Transcription*, ID2 secures cDC1 specification by antagonizing E protein activity at a pleiotropic *Zeb2* enhancer (poster)
- 2025 *FASEB Mechanisms of Immune Cell Development and Function*, ID2 secures cDC1 specification by antagonizing E protein activity at a pleiotropic *Zeb2* enhancer (oral presentation)
- 2025 *WashU Genetics Work-in-Progress*, E proteins facilitate *Zeb2* expression in lymphoid and dendritic cell development
- 2024 *4D Nucleome (4DN) Annual Meeting*, E proteins facilitate *Zeb2* expression for balanced lymphoid and myeloid development (poster)
- 2024 *WashU Immunology Program Annual Retreat*, E proteins facilitate *Zeb2* expression in lymphoid and dendritic cell development
- 2024 *CSHL Gene Expression & Signaling in the Immune System*, Optimization of the *Irf8* +32-kb enhancer disrupts dendritic cell lineage segregation (poster)
- 2024 *WashU Immunology Program Work-in-Progress* (recruitment seminar), Optimization of the *Irf8* +32-kb enhancer disrupts dendritic cell lineage segregation
- 2022 *CSHL Gene Expression & Signaling in the Immune System*, A synthetic high-affinity *Irf8* +32-kb enhancer converts pre-cDC2 to cDC1 and cDC1-like cells (poster)
- 2022 *WashU Immunology Program Annual Retreat*, A synthetic high-affinity *Irf8* +32-kb enhancer converts pre-cDC2 to cDC1 and cDC1-like cells (poster)
- 2022 *WashU Markey Pathway Annual Retreat*, A synthetic high-affinity *Irf8* enhancer converts pre-DC2 into DC1-like cells

## RESEARCH SKILLS

---

- **Mouse genetics:** CRISPR/Cas9 genome editing, breeding, genotyping, and colony management
- **Molecular cloning**
- **Flow cytometry and FACS sorting**
- **Cell culture:** established cell lines and primary bone marrow-derived immune cell cultures
- **Genomics assays and analyses:** CUT&RUN, bulk RNA-seq, and single-cell RNA-seq

## PIVOT PREPARATION

---

- Regular participant in WashU Genetics Seminar Series and Work-in-Progress meetings (2023 – present)
- Regular participant in WashU Immunology Seminar Series, Work-in-Progress meetings, and Journal Clubs (2019 – present)

- Completed year-long Bioinformatics Workshop Series (2023 – 2024) to strengthen computational skills for genomic data analysis
- Took *BIO 5488 Genomics* (Spring 2023) after fulfilling credit requirements to develop foundational knowledge for my disciplinary transition
- Read *From DNA to Diversity: Molecular Genetics and the Evolution of Animal Design* to deepen understanding of developmental gene regulation

## TEACHING EXPERIENCE

---

**Teaching Assistant**, *BIO 5053 Immunobiology I* (graduate level), WashU, Fall 2020

Course Director: Dr. Takeshi Egawa

Enrollment: 29 students

Led weekly review sections, drafted and graded assignments and three exams

## MENTORSHIP EXPERIENCE

---

- **Dr. Magdalena Kraft:** Dr. Kraft is a postdoctoral researcher who joined the Murphy lab in 2024. Since her arrival, I have been actively involved in her training, and we are currently initiating a collaborative project.
- **Ms. Alyssa R. Koch:** Alyssa joined the Murphy lab after completing her rotation as a student in the Immunology program in 2025. I began mentoring her during her rotation and continue to provide training and guidance.
- **Ms. Wenxuan Cheng:** Wenxuan joined the Murphy lab in 2025 after completing her rotation as a student in the Immunology program in 2024. I began mentoring her during her rotation and continue to provide training and guidance.
- **Mr. Haolin (Charles) Shen:** Charles was an undergraduate student who majored in Biology. I mentored him throughout his research in the Murphy lab in 2022 -2023. He received his BA in 2023 and is now a Ph.D. student in the Biomedical Sciences Program at the University of California, San Francisco, in Dr. Jason G. Cyster's lab.

## LEADERSHIP & SERVICE

---

- Founded and led a regular basketball group for graduate students and postdocs at the WashU Medical Campus (2022 – present)
- Participated in multiple mock qualifying exams to help fellow PhD students prepare for their prelims (2021–present)

## EDITORIAL ACTIVITY

---

- Topic coordinator: *Frontiers in Immunology*
- *Ad hoc* reviewer: *The Journal of Experimental Medicine*, *Nature Communications*
